Good color, or color that expresses the *light key* of nature, can make even the most mundane subject matter strikingly beautiful. "Anything under the sun is beautiful if you have the vision — it is the seeing of the thing that makes it so," from Hawthorne on Painting.

I see a remarkable change in my students' work after only one day of painting. They begin to see color in the shadows. Many students say they have discovered a world of color that has changed them forever — their vision has been altered.
